SO5032 Course outline

SO5032 Spring 2022/3 – Module outline

Module Code:	SO5032
Module Title:	Quantitative Research Methods II (MA)
Academic Year:	2022/3
Semester:	Spring
Lecturer(s):	Dr Brendan Halpin
Lecture Locations:	Lec Mon 12-1400 A1054, Lab Tue 16-1800 A0060a
Lecturer(s) Contact Details:	brendan.halpin@ul.ie
Lecturer(s) Office Hours:	Mon 1430-1730

Short Summary of Module:

Intermediate quantitative research methods for sociology, following on from SO5041.

Aims and Objectives of Module:

- A continuation of SO5041 – builds on what was learnt there
- A deeper look at methods already covered, especially regression
- Related methods more suited to social science data: methods for categorical and ordinal variables, including logistic regression
- Further use of Stata:
 - Use in a production environment – do-files, logging, reproducibility
 - More complex data handling
 - Further analytic procedures
- Secondary analysis: real research with existing data sets

Learning Outcomes:

- Deeper understanding of methods for analysis of categorical data
- Understanding of the nature of multivariate causality
- Understanding of the theory and practice of multiple linear regression
- An understanding of some methods for regression with categorical dependent variables
- Deeper understanding of sampling practice and theory
- Practical skills for accessing and analysing large-scale data sets
- An ability to read quantitative social research
- Greater competence in Stata, particularly for handling larger projects

Course Structure:

One two-hour lecture per week, one two-hour lab per week.

Detailed outline

- Revisit χ^2 , look at methods for more complex analysis of categorical (nominal *and* ordinal) data (chapter 8, Agresti & Finlay)(1-2 weeks)
- Multivariate causality (chapter 10 from A&F) (1 week)
- Multiple regression (chapters 11, 14 from A&F) (3 weeks plus)
- More sampling theory: clusters, strata, weighting (1 week)
- Data sets, data archives and secondary analysis (1 week, ongoing in labs)
- Logistic regression: regression where the dependent variable is binary (or multinomial) rather than continuous (chapter 15 from A&F) (3 weeks plus)
- Reading statistical research – what gets published and how to read it (1-2 weeks/on-going)

Lecture topics by week

Week	Topic	Lecture	Lab
beginning		Mon 12-1400	Tue 16-1800
1: Jan 23	Categorical data, association in tables	✓	✓
2: Jan 30	Association in ordinal data	✓	✓
3: Feb 06	Understanding multidimensional causality	X	✓ (lecture)
4: Feb 13	Introducing multiple regression	✓	✓
5: Feb 20	Further multiple regression	✓	✓
6: Feb 27	Multiple regression: residuals & influence	✓	✓
7: Mar 06	Regression with logged dependent variables	✓	✓
8: Mar 13	Introducing logistic regression	✓	X
9: Mar 20	Further logistic regression	✓	✓
10: Mar 27	Multinomial regression	✓	✓
11: Apr 10	Bank holiday, lab only	X	✓
12: Apr 17	Regression for ordinal dependent variables	✓	✓

- Main text: Agresti, *Statistical Methods for the Social Sciences* – particularly chapters 8, 10, 11, 14 and 15
- Supplementary texts:
 - de Vaus, *Surveys in Social Research*: good on survey methodology
 - Agresti, *Introduction to Categorical Data Analysis*
 - Pevalin and Robson, *The Stata Survival Manual*

Details of Module Assessment:

- Three assignments, weeks 6, 11 and 15.
- The first two assignments are worth 20% each.
- The final assignment is a project, worth 60%, and should be worked on throughout the semester (see below).

Details of Annual Repeats:

A 100% assignment, to be submitted in the examination period.

SULIS and Other Classroom Technologies:

- The module will use SULIS for submission of assignments and for provision of materials.
- <http://teaching.sociology.ul.ie/so5032> will also be used

IN TERM ASSIGNMENT(S):

- Assignment 1: Homework exercises relating to linear regression.
 - Marks: 20%
 - Deadline: End week 6
- Assignment 2: Homework exercises relating to categorical data analysis.
 - Marks: 20%
 - Deadline: End week 11
- Assignment 3: A project This will involve the use of large-scale survey data, and require the formulation of a research question, and its addressing using statistical analysis.
 - Marks: 60%
 - Deadline: End week 15.

FEEDBACK:

Detailed feedback on assignments 1 and 2 will be given in weeks 8 and 13, by e-mail and on request face-to-face. Feedback on assignment 3 will be provided on request after the semester.

It hardly needs to be said, but all work must be your own. All material drawn from other sources must be clearly attributed. Passing off others' work as your own is considered academic dishonesty, and can be subject to substantial penalties. Please familiarise yourself with the departmental policy on plagiarism and use the coversheet declaration with all assignments (both available at <http://www.ul.ie/sociology/> under Student Resources).

Please also note the Department's policy on deadlines, also available at <http://www.ul.ie/sociology/> under Student Resources.
